

Synology®

Personal Cloud

**BeeStation Plus** 4TB

## Create a private cloud for personal productivity

With 4 TB<sup>1</sup> of built-in storage, BeeStation Plus is designed for data-intensive professionals who require fast, responsive performance for everyday workflows. It handles large file transfers, supports Plex Media Server for media streaming, and works with Synology Cameras<sup>3</sup> to serve as a private home monitoring hub—bringing work, security, and entertainment together in one place.

## Highlights

- Set up a private cloud in minutes and start managing data, personal streaming, or home monitoring
- Bring your data from computers, tablets, phones, external drives, and cloud services to one place and access them anywhere, anytime
- Back up phone photos and use local AI to search for people or subjects
- Supports Plex Media Server for media file organization and streaming from anywhere<sup>2</sup>
- Supports Synology Camera<sup>3</sup> for indoor home monitoring, including live view, AI detect alerts, and recording storage
- Data is protected by default with snapshot-based restore points to help recover from ransomware
- 3 months of BeeProtect included, an affordable, privacy-first cloud backup to protect your BeeStation Plus from physical damages
- 3-year warranty included

## **Set up in minutes – Dive right into meaningful work**

Scan a QR code, plug in the power and Ethernet cables, and press a button to confirm—that's all you need to do after unboxing. After that, you're all set to start transferring files or photos to your private cloud storage, and focus on what truly matters.

## **Store everything here. Access anywhere.**

With 4 TB<sup>1</sup> of storage space, you can store all your work and personal files here. Once they're on BeeStation, you can reach them from any web browser, as well as from the desktop or mobile apps. Also, since you can use your Google Account, Apple ID, or Synology Account to sign in, you won't have to remember any extra logins.

## **Never max out phone storage again**

Backing up photos to BeeStation is as simple as opening the app. Just got back home from a trip? Turn on Focus Backup, and let thousands of photos upload overnight while you rest. Once backed up, your photos will be securely stored and accessible wherever you go.

## **Gather your scattered photos under one roof**

Managing photos across cloud storage and external drives can be a hassle. With BeeStation desktop app, you can transfer images from Google Photos, USB drives, or local folders on your computer to manage them in one place. You can also connect your iCloud Photos for automatic downloads, ensuring a local

backup is available to protect against accidental deletions.<sup>4</sup>

## Photo organizer driven by local AI

Accelerated by its built-in GPU, BeeStation Plus's AI makes it easier than ever to find the people, pets, or things you're looking for—without ever sending your data to the cloud. You can also explore a world map to rediscover photos from the places you've been. With these features and more, BeeStation takes the work out of photo organization, all while keeping your information secure and private.

## Keep your cloud and USB files in one place

Got files all over the place? BeeStation can sync files from Google Drive, OneDrive, Dropbox, including their collaborative workspace<sup>4</sup>, as well as back up any connected external and flash drives. That way, if you ever lose access to a cloud account or can't find a physical external drive, you can rest easy knowing you've got a backup.

## Got room to spare? Share the storage with others

Share storage with up to 8 users on one BeeStation. Send an invitation link to give each person their own private cloud space, completely separate from others. Users on the same BeeStation can also share files and folders—whether collaborating on the same project or collecting family photos—allowing everyone to view, upload, or remove files directly from the BeeStation interface.

## Home monitoring that is truly yours

BeeStation Plus now supports up to four Synology Cameras<sup>3</sup> through BeeCamera, a home monitoring experience for those who want to keep an eye on their space without cloud dependency. All recordings are stored locally, while BeeCamera keeps you connected to your home or workspace with AI detection

for people, pets, vehicles, and intrusions, plus live view for checking in anytime you're away. Easily review events and recordings, save key moments, and securely share access with other BeeStation users. Learn more at <https://sy.to/BeeCamera>.

## Stream your media with Plex Media Server

BeeStation Plus features Plex Media Server, allowing you to create and organize a personal media library. Access and stream your video collection to TV, computer, phone, or tablet anytime, from anywhere.<sup>2</sup>

## Comprehensive PC protection with Acronis True Image

Back up the entire Mac or PC with Acronis True Image to BeeStation for peace of mind. Every BeeStation includes a 3-year Acronis True Image license, supporting full-system backups, one-click recovery, and ransomware protection to ensure fast system restoration and data safety.<sup>6</sup>

## One copy is not enough. Back up your BeeStation

Following the proven 3-2-1 backup principle, BeeStation allows you to create an additional copy of your data by backing up to another Synology NAS or an external drive. This ensures your data remain safe and recoverable even if your BeeStation is lost or damaged.

## BeeProtect – Affordable, set-and-forget cloud backup

Every BeeStation includes a complimentary 3-month BeeProtect subscription, a privacy-first cloud backup service featuring client-side AES-256 encryption. This ensures all your data is encrypted with your password before being

uploaded. With your files stored off-site, you can retrieve them anytime through a web browser if your BeeStation is no longer accessible due to theft, damage, or loss. Learn more at <https://sy.to/BeeProtect.7>

Note: Specifications are subject to change without notice. Please refer to the model's [specifications page](#) for the most up-to-date information.

1. 1 TB = 1 trillion bytes. Actual usable capacity is approximately 3.48 TB.
2. Remote access and certain features of Plex Media Server are available only with a Plex Pass subscription. Learn more at [Plex official website](#).
3. For compatible camera models, please refer to this [page](#).
4. The iCloud Photos download feature relies on a third-party cloud service and may be subject to change at any time without prior notice.
5. BeeStation supports sync to Google Shared Drive, Dropbox Team Space, and Microsoft OneDrive for Business.
6. Only one license is provided per BeeStation unit. This is a limited-time offer and may be modified or discontinued at any time without prior notice. Offer availability may vary by region. Synology and Acronis reserve the right to modify or terminate the offer at any time. For more information, please refer to the [Redemption Terms and Conditions for Synology Bee Series with Acronis True Image](#).
7. BeeProtect covers data stored on BeeStation; however, data generated by the BeeCamera application is not included. Learn more at [BeeProtect Terms and Conditions](#).
8. Excluding Windows on ARM and Windows Server editions.
9. The warranty period starts from the purchase date as stated on your purchase receipt.
